29: Major problems and concerns (control problems, social/political/economic concerns or impacts, etc.) Relate critical resources needs identified above to the Incident Action Plan. Problems for control include but are not limited to the following: 1. Drought stressed fuels, fire cured fuels and reburns based on needle cast inside the fire perimeter. 2. Limited access to areas based on terrain and soil conditions. 3. Erratic winds and possible lightning starts caused by afternoon thunderstorms.

---	--

32: Today's observed fire behavior (leave blank for non-fire events):
Fire behavior was low today based on overcast conditions, higher Relative Humidity and lower wind speeds.

33: Significant events today (closures, evacuations, significant progress made, etc.):
Due to clean up of financial database today's estimated cost for today will show a decrease.

34: Forecasted Weather for next Operational Period Wind Speed (mph): 8 Temperature: 97 Wind Direction: SW Relative Humidity: 49	35: Estimated Control Date and Time:	36: Projected Final Size: 19,169	37: Estimated Final Cost:
---	--------------------------------------	---	---------------------------

38: Actions planned for next operational period:
Continue to mopup and monitor control lines and assist local district on Initial Attack as needed.

- 39: For fire incidents, describe resistance to control in terms of:
1. Growth Potential - **Medium**
 2. Difficulty of Terrain - **High**

40: Given the current constraints, when will the chosen management strategy succeed?
Sustained rain will be needed to obtain control of the fire.

41: Projected demobilization start date:

42: Remarks:
Resources committed to the Sweatfarm Fire but not included in the Committed Resources field: 1. Five Motor Graders - State Resource 2. One Excavator - State Resource 3. One Mechanic - State Resource
